

John Wood® commercial heavy-duty electric water heaters are an advanced line with the features contractors and engineers demand. Custom-built to order, choose from: 49, 74 and 111 US gallons, 6 to 54kW input and 208, 240 and 600 volts.

Features

Energy Savings

- Meets or exceeds ASHRAE Efficiency Standard 90.1 2007

Designed for Performance

- Factory installed 1.5" dielectric cold water inlet and hot water outlet nipples for ease of installation
- Conveniently located handhole cleanout
- Factory installed T&P and brass drain valve
- Durable textured finish
- High-performance incoloy screw-in elements
- Equipped with multiple anode rods for long life
- Galvanized base to prevent damage caused by excess moisture on the floor's surface
- 2" CFC-free foam insulation
- Surface or Immersion thermostat for more accurate temperature control
- Immersion thermostat ideal where 180°F is required in sanitizing applications

Serviceability

- Easy to service from front access panel

RECOVERY

WARRANTY

3 Year Limited Tank Warranty

1 Year Limited Parts Warranty

Consult installation manual for terms and conditions or visit www.johnwoodwaterheaters.com for more information.

CONFIGURING YOUR MODEL

1. Select thermostat Note: Immersion thermostat is required for 180°F (82°C) sanitizing applications.	Surface (JW-ES) or Immersion (JW-EI)
2. Select capacity required (USG)	49 / JW-E(S/I)-50 74 / JW-E(S/I)-80 111 / JW-E(S/I)-119
3. Select input (kW)	6-54
4. Select voltage (600 Volt available in 3 Ph only)	208, 240 or 600
5. Select phase	1 or 3
Example: JW-EI-80-45-240-3 is an 74 U.S. Gallon, 45 kW, 240 volt, 3 phase model with an Immersion Thermostat.
