

The John Wood[®] ENERGY STAR[®] qualified Power Direct Vent water heater is designed with a sealed combustion chamber, ultra-quiet blower and state-of-the-art gas control for highly accurate and reliable temperature regulation. Perfect for both residential new home construction and replacement water heater applications.

Features

Energy Savings

- ENERGY STAR qualified
- Exceeds NRCAN energy efficiency standards

Designed for Performance

- Compact design – ideal as a replacement water heater and for closet installations
- Exclusive TankSaver[®] design to prolong tank life
- Ultra-quiet blower
- Convenient 3/4" side water connections for combination applications on high input 65,000 BTU units (plugs are factory installed)
- Can be installed at altitudes up to 7,700 ft. (2,347 m)
- Factory installed T&P valve and drip tube
- Glass coated tank provides superior protection against corrosion

Safety Features

- Sealed Combustion Chamber design, eliminating the need for FV sensor
- Zero clearance to combustibles

Serviceability

- State-of-the-art gas control features advanced self-diagnostic capability that makes troubleshooting easy
- Conveniently located T&P and drain valve for ease of serviceability
- Auto-reset temperature switch monitors vent temperature

The Ultimate in Venting Flexibility

- Can be vented with ULC s636 PVC or CPVC or polypropylene up to 50 equivalent feet with 2" pipe, horizontally through the wall or vertically through the roof, except for 65,000 BTU high input model (see installation manual for full details)
- Can be installed using Concentric Vent Kit (see reverse or installation manual for full details)

WARRANTY

8 Year Limited Tank Warranty

6 Year Limited Parts Warranty

Consult installation manual for terms and conditions or visit www.johnwoodwaterheaters.com for more information.
